Professional Summary

- Detail-oriented Computer Science graduate from the University of Virginia with hands-on experience in software engineering, cybersecurity, and data management.
- Skilled in developing secure applications, managing file transfers, IT helpdesk work, and leading agile teams. Adept at solving complex problems with code and collaborating cross-functionally to deliver technical solutions.

Education

University of Virginia, College of Arts and Sciences | Charlottesville, VA | Aug 2021 - May 2025

Major: Computer Science

Relevant Coursework:

- Introduction to Cybersecurity: Scanned networks, performed both penetration and web app vulnerability tests, and implemented a keylogger in Python on a Kali Linux VM.
- Software Engineering: Worked as the Scrum Master and developer in a group of five to create a web app for UVA club management using Python, Django, and Heroku.
- Data Structures and Algorithms I/II: Implemented adaptations and specific use cases of Dijkstra's Algorithm, divide-and-conquer algorithms, etc.

Technical Skills

Programming Languages: Python, Java, C#, SQL, C, C++, JavaScript

Software & Tools: Git, Visual Studio Code, PyCharm, Jupyter Notebook, GoAnywhere MFT, Wireshark, Adobe Suite, Eclipse

Web Development: Django, React, Node.js, Express.js, Heroku, JavaScript, HTML/CSS3, RESTful APIs

Frameworks & Platforms: Django, Heroku, .NET, Unity, AWS, Spring

Methodologies: Agile/Scrum

Specialized Skills: Data visualization, Cybersecurity practices, Application Development, File Transfer Protocols, ETL Pipelines

Misc. Experience: Linux, Windows, M365, Networking concepts, Remote support, Machine Learning basics

Professional Experience

Blue Ridge Medical Center September 2025 – December 2025- Data Specialist

- Analyzed community needs and undertook healthcare research to inform and advise the medical center through reports and data analysis
- Utilized Python and SQL to create desktop applications to give organization members insight on provider compliance.
- Gained experience in data warehousing via ETL, data modeling with tableau.
- Collaborated with community stakeholders to improve facility access, focusing on financial savings potential and improving local health outcomes
- Created GIS solutions to data mapping challenges using QGIS, JavaScript, Leaflet

Virginia Department of Social Services June – September 2023 - Systems Support Intern

- Implemented MFT workflows to support the secure transfer of files among government agencies and clients.
- Developed low-code applications to facilitate file transfers using GoAnywhere MFT.
- Worked with a hybrid team to satisfy client needs and determine best coding practices.

Epicured June 2022 – January 2023 - Data Management Specialist

- Analyzed and cleaned data with Excel for executive oversight and use within tax forms.
- Architected digital asset management solutions for the company to assist with collaborative access to photography, Adobe suite files, videos, excel sheets, and more.
- Interviewed investors relating to personal data needed to complete company K1 forms.

True-Coast July – September 2021 - Application Developer and Media/Marketing Manager

- Researched API capabilities relating to Geographic Information Systems using GitHub's collaborative interface.
- Designed, scheduled, and implemented an outreach program across all social media platforms.
- Created all graphics used for company projects, including backgrounds, banners, and infographics.
